² Affiliation 2; e-mail@e-mail.com

* Correspondence: e-mail@e-mail.com; Tel.: (optional; include country code; if there are multiple corresponding authors, add author initials) +xx-xxxx-xxx-xxxx (F.L.)

† Current address: Affiliation 3

‡ These authors contributed equally to this work.

Abstract: A single paragraph of about 200 words maximum. For research articles, abstracts should give a pertinent overview of the work. We strongly encourage authors to use the following style of structured abstracts, but without headings: (1) Background: place the question addressed in a broad context and highlight the purpose of the study; (2) Methods: describe briefly the main methods or treatments applied; (3) Results: summarize the article's main findings; (4) Conclusion: indicate the main conclusions or interpretations. The abstract should be an objective representation of the article, it must not contain results which are not presented and substantiated in the main text and should not exaggerate the main conclusions.

Keywords: keyword 1; keyword 2; keyword 3 (List three to ten pertinent keywords specific to the article; yet reasonably common within the subject discipline.)

0. How to Use this Template

The template details the sections that can be used in a manuscript. Note that the order and names of article sections may differ from the requirements of the journal (e.g., the positioning of the Materials and Methods section). Please check the instructions on the authors' page of the journal to verify the correct order and names. For any questions, please contact the editorial office of the journal or support@mdpi.com. For LaTeX-related questions please contact latex@mdpi.com.

1. Introduction

The introduction should briefly place the study in a broad context and highlight why it is important. It should define the purpose of the work and its significance. The current state of the research field should be reviewed carefully and key publications cited. Please highlight controversial and diverging hypotheses when necessary. Finally, briefly mention the main aim of the work and highlight the principal conclusions. As far as possible, please keep the introduction comprehensible to scientists outside your particular field of research. Citing a journal paper [1]. Now citing a book reference [2,3] or other reference types [4–6]. Please use the command [7,8] for the following MDPI journals, which use author–date citation: Administrative Sciences, Arts, Econometrics, Economies, Genealogy, Histories, Humanities, IJFS, Journal of Intelligence, Journalism and Media, JRFM, Languages, Laws, Religions, Risks, Social Sciences.

2. Materials and Methods

Materials and Methods should be described with sufficient details to allow others to replicate and build on published results. Please note that publication of your manuscript implicates that you must make all materials, data, computer code, and protocols associated with the publication available to readers. Please disclose at the submission stage any restrictions on the availability of materials or information. New methods and

36 protocols should be described in detail while well-established methods can be briefly
37 described and appropriately cited.

38 Research manuscripts reporting large datasets that are deposited in a publicly
39 avail-able database should specify where the data have been deposited and provide the
40 relevant accession numbers. If the accession numbers have not yet been obtained at the
41 time of submission, please state that they will be provided during review. They must be
42 provided prior to publication.

43 Interventionary studies involving animals or humans, and other studies require
44 ethical approval must list the authority that provided approval and the corresponding
45 ethical approval code.

46 This is an example of a quote.

47 3. Results

48 This section may be divided by subheadings. It should provide a concise and precise
49 description of the experimental results, their interpretation as well as the experimental
50 conclusions that can be drawn.

51 3.1. Subsection

52 3.1.1. Subsubsection

53 Bulleted lists look like this:

- 54 ● First bullet;
- 55 ● Second bullet;
- 56 ● Third bullet.

57 Numbered lists can be added as follows:

- 58 1. First item;
- 59 2. Second item;
- 60 3. Third item.

61 The text continues here.

62 3.2. Figures, Tables and Schemes

63 All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

Figure 1. This is a figure. Schemes follow the same formatting. If there are multiple panels, they should be listed as: (a) Description of what is contained in the first panel. (b) Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

Table 1. This is a table caption. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
Entry 1	Data	Data
Entry 2	Data	Data

64 Text.

65 Text.

66 3.3. *Formatting of Mathematical Components*

This is the example 1 of equation:

$$a = 1, \quad (1)$$

67 the text following an equation need not be a new paragraph. Please punctuate equations
68 as regular text.

69 This is the example 2 of equation:

$$a = b + c + d + e + f + g + h + i + j + k + l + m + n + o + p + q + r + s + t + u + v + w + x + y + z \quad (2)$$

Figure 2. This is a wide figure.

70 Please punctuate equations as regular text. Theorem-type environments (including
71 propositions, lemmas, corollaries etc.) can be formatted as follows:

72 **Theorem 1.** *Example text of a theorem.*

73 The text continues here. Proofs must be formatted as follows:

74 **Proof of Theorem 1.** Text of the proof. Note that the phrase “of Theorem 1” is optional
75 if it is clear which theorem is being referred to. □

76 The text continues here.

77 4. Discussion

78 Authors should discuss the results and how they can be interpreted from the
79 perspective of previous studies and of the working hypotheses. The findings and their
80 implications should be discussed in the broadest context possible. Future research
81 directions may also be highlighted.

82 5. Conclusions

83 This section is not mandatory, but can be added to the manuscript if the discussion
84 is unusually long or complex.

85 6. Patents

86 This section is not mandatory, but may be added if there are patents resulting from
87 the work reported in this manuscript.

88 **Author Contributions:** For research articles with several authors, a short paragraph specifying
89 their individual contributions must be provided. The following statements should be used
90 “Conceptualization, X.X. and Y.Y.; methodology, X.X.; software, X.X.; validation, X.X., Y.Y. and
91 Z.Z.; formal analysis, X.X.; investigation, X.X.; resources, X.X.; data curation, X.X.; writing—
92 original draft preparation, X.X.; writing—review and editing, X.X.; visualization, X.X.; supervision,
93 X.X.; project administration, X.X.; funding acquisition, Y.Y. All authors have read and agreed
94 to the published version of the manuscript.”, please turn to the [CRediT taxonomy](#) for the term
95 explanation. Authorship must be limited to those who have contributed substantially to the
96 work reported.

97 **Funding:** Please add: “This research received no external funding” or “This research was funded
98 by NAME OF FUNDER grant number XXX.” and and “The APC was funded by XXX”. Check
99 carefully that the details given are accurate and use the standard spelling of funding agency names
100 at <https://search.crossref.org/funding>, any errors may affect your future funding.

101 **Institutional Review Board Statement:** In this section, you should add the Institutional Review
102 Board Statement and approval number, if relevant to your study. You might choose to exclude
103 this statement if the study did not require ethical approval. Please note that the Editorial Office
104 might ask you for further information. Please add “The study was conducted according to the
105 guidelines of the Declaration of Helsinki, and approved by the Institutional Review Board (or
106 Ethics Committee) of NAME OF INSTITUTE (protocol code XXX and date of approval).” OR
107 “Ethical review and approval were waived for this study, due to REASON (please provide a
108 detailed justification).” OR “Not applicable” for studies not involving humans or animals.

109 **Informed Consent Statement:** Please add “Informed consent was obtained from all subjects
110 involved in the study.” OR “Patient consent was waived due to REASON (please provide a
111 detailed justification).” OR “Not applicable” for studies not involving humans.

112 **Data Availability Statement:** Please refer to suggested Data Availability Statements in section
113 “MDPI Research Data Policies” at <https://www.mdpi.com/ethics>.

114 **Acknowledgments:** In this section you can acknowledge any support given which is not covered
115 by the author contribution or funding sections. This may include administrative and technical
116 support, or donations in kind (e.g., materials used for experiments).

117 **Conflicts of Interest:** Declare conflicts of interest or state “The authors declare no conflict of
118 interest.” Authors must identify and declare any personal circumstances or interest that may be
119 perceived as inappropriately influencing the representation or interpretation of reported research
120 results. Any role of the funders in the design of the study; in the collection, analyses or interpretation
121 of data; in the writing of the manuscript, or in the decision to publish the results must be
122 declared in this section. If there is no role, please state “The funders had no role in the design of
123 the study; in the collection, analyses, or interpretation of data; in the writing of the manuscript, or
124 in the decision to publish the results”.

125 **Sample Availability:** Samples of the compounds ... are available from the authors.

126 Abbreviations

127 The following abbreviations are used in this manuscript:

128	MDPI	Multidisciplinary Digital Publishing Institute
	DOAJ	Directory of open access journals
129	TLA	Three letter acronym
	LD	Linear dichroism

130 Appendix A

131 *Appendix A.1*

132 The appendix is an optional section that can contain details and data supplemental
133 to the main text—for example, explanations of experimental details that would disrupt
134 the flow of the main text but nonetheless remain crucial to understanding and reproduc-
135 ing the research shown; figures of replicates for experiments of which representative
136 data are shown in the main text can be added here if brief, or as Supplementary Data.
137 Mathematical proofs of results not central to the paper can be added as an appendix.

138 Appendix B

139 All appendix sections must be cited in the main text. In the appendices, Figures,
140 Tables, etc. should be labeled, starting with “A”—e.g., Figure A1, Figure A2, etc.
